Product Description

Factory wholesale HD LCD screen Core I3 I5 I7 RAM 256gb 512gb 23.6 inch all-in-one computer suitable for business office Working

Service

1. Efficient, professional, and quick response:
Equipped with a professional after-sales team, we can quickly respond to customer needs and provide efficient solutions.
2. Accurate solutions and technical guarantees:
We provide accurate technical support and maintenance services for different problems to ensure that the problems are **completely solved.**
3. All-round services, considerate and thoughtful:
We provide a full range of services such as product consultation, usage guidance, and troubleshooting to meet the diverse needs of customers.
4. Customer first, win-win cooperation:
With customer satisfaction as the purpose, we continuously improve service quality and establish long-term and stable cooperative relationships with customers.
Choose us, worry-free after-sales and win-win cooperation!

Selling Points

1.Business office preferred:
The all-in-one computer has a professional appearance and stable performance, suitable for corporate office or business presentation scenarios.
2. Cloud collaboration:
Supports cloud storage and cloud office software, convenient data synchronization and team collaboration, and improves work efficiency.
3. Long-lasting design:
Some models are equipped with built-in batteries, which can continue to work after power failure, suitable for unstable power environments.
4. Environmentally friendly materials:
Made of recyclable materials, it reduces environmental pollution and conforms to the concept of sustainable development.

Products Description

This all-in-one touchscreen computer has a wide viewing angle display, suitable for multiple people to watch at the same time. It has precise operation and is suitable for education and training scenarios. The body has a built-in efficient heat dissipation system to keep the device running stably. The overall design is simple and suitable for modern office environments. The built-in HD camera is suitable for video conferencing and online teaching.

Theory

All-in-one computers have built-in speakers and microphones to achieve audio and video integration. The principle is that the sound signal is processed by the audio chip and then output through the speaker. The video signal is processed by the graphics card and displayed through the monitor. This design simplifies the complexity of external devices and improves the multimedia experience.

Usage

1. Fitness interactive assistant:
The all-in-one machine is used for fitness guidance and course playback in the gym, and supports real-time motion capture and feedback. Its large screen and interactive functions help users correct their movements and improve exercise effects, which is suitable for fitness studios and home fitness scenarios.
2. Library self-service borrowing terminal:
The all-in-one machine is used in the library for self-service borrowing and returning books and query services, supporting code scanning and identity verification. Its convenient operation and efficient processing capabilities reduce queuing time and are suitable for modern libraries and public cultural venues.
3. Industrial control panel:
The all-in-one machine is used for equipment monitoring and operation control in factories, supporting real-time data display and command input. Its durability and high stability are suitable for harsh industrial environments, improving production efficiency and safety.

Parameter
