

Vertical Viewing Angle Of 178° 27" Curved I7 Desktop All In One PC For Home Office

Our Product Introduction

for more products please visit us on allinonepccomputers.com

Basic Information

- Place of Origin: Guangdong, China
- Brand Name: WPNA
- Certification: CE/FCC/RoHs/ISO9001/CCC
- Model Number: E240
- Minimum Order Quantity: 50 units
- Price: Negotiable
- Packaging Details: carton, bubble bag, stretch film
- Delivery Time: 15-30 workdays
- Payment Terms: L/C, D/A, D/P, T/T, Western Union, MoneyGram
- Supply Ability: 10000 Piece/Pieces per Month

Product Specification

- Product Name: AIO Desktop Computer
- Operating System: Windows 10/11/Ubuntu/Linux
- Processor Brand: Intel/AMD
- Memory: 4G/8G/16G/32G Optional
- HDD/SSD: 128GB/286GB/512GB/1TB/2TB
- Series: For Home & Student
- Plugs Type: US, JP, CN, AU, UK, EU
- Graphics Card Type: Dedicated Card
- Display Ratio: 16:9
- Display Resolution: 1920x1080
- Graphics Card Chipset: Dedicated Card
- Warranty(Year): 1-Year
- Highlight: **WPNA Curved All In One PC, 178 Degree all in one computer for business**

Product Description

High quality 27" curved home office i7 computer desktop all-in-one pc

Technology

The housing of the integrated device is produced through the injection molding process. Plastic pellets are heated to a molten state, injected into a mold, and cooled to form the housing. The temperature, pressure, and time must be strictly controlled during the injection molding process to ensure that the housing is accurate in size and has a smooth surface. After molding, the housing undergoes post-processing processes such as grinding and polishing to further improve the appearance quality.

Theory

The heat dissipation principle of all-in-one computers is based on heat conduction and convection. The heat generated by the CPU and GPU is transferred to the fan through the heat sink and then discharged from the body through the air duct. Due to limited space, low-noise fans and heat pipe technology are usually used to ensure heat dissipation efficiency. Some high-end models also use liquid cooling systems to further improve heat dissipation performance.

Advantage

Ultimate performance:

The all-in-one is equipped with a top-level processor and a discrete graphics card to provide an ultimate performance experience. Whether it is gaming or professional design, it can run smoothly to meet the needs of high-end users.

Ultra-narrow bezel:

The all-in-one adopts an ultra-narrow bezel design, with a high screen-to-body ratio and stunning visual effects. Whether it is work or entertainment, it can provide an immersive experience.

Intelligent dimming:

The all-in-one display supports intelligent dimming function, which automatically adjusts the brightness according to the ambient light. While protecting your eyes, it can also save energy.

Wireless projection:

The all-in-one supports wireless projection, and users can project the content on their mobile phones or tablets onto the big screen. Suitable for conference presentations and home entertainment.

High refresh rate:

The all-in-one display supports high refresh rate, and the picture is smooth and without ghosting. Suitable for gamers and video editors, providing an ultimate visual experience.

Modular design:

The all-in-one adopts a modular design, and users can upgrade the hardware according to their needs. Extend the service life of the equipment and reduce replacement costs.

Intelligent voice:

The all-in-one has a built-in intelligent voice system that supports voice input and voice search. Improve the convenience of operation, suitable for users who are not good at typing.

Quick Start:

The all-in-one supports quick start function, which allows you to enter the system in seconds. Save waiting time and improve work efficiency.

High scalability:

The all-in-one provides a variety of expansion interfaces, and users can connect various peripherals according to their needs. Meet the usage needs in different scenarios.

Professional color:

The all-in-one display is professionally color calibrated with high color reproduction. Suitable for designers and photographers, providing accurate color performance.

AIO Description

This all-in-one touchscreen computer has a large display screen that provides an immersive visual experience. The touch screen is responsive and supports stylus input, making it suitable for the education industry and students. The body is made of environmentally friendly materials, in line with the concept of green office. The built-in stereo speakers provide clear sound quality, suitable for entertainment and multimedia applications. The overall design is compact and space-saving, suitable for small offices and homes.

SIZE

23.6 inch

Specification

Model	E240/270
Size	24/27inch
Processor	i3/i5/i7
Memory	4G/8G/16G/32G
LAN	Gigabit Ethernet
Audio	Stereo Sound Output
USB	6*USB2.0
Hard Disk	32G/64G/128G/512G/1TB/2TB
Color	White
Adapter	12V6A
Operating System	WIN10/11
Resolution	1920*1080
Contrast	1000:1
Speaker	High Fidelity Sound Speaker
Type of Hard Disk	MSAST/M.2

Company Information

ABOUT US

Guangzhou Weipuna Technology Development Co., Ltd. is a factory manufacturer that mainly produces advanced high technology products of R&D, manufacturing and sales of all-in-one computer, mini PC, touch screen monitor, smart teaching& conference panel and laptop computer. Under joint efforts of our professional R&D technology team, we will commit to manufacturing and providing more high end products to global market in the future
