### Product Description

#### HL140Y Ultra Thin Laptop Lightweight And Portable For Maximum Productivity Touch Screen 360 Flip

#### Technology

##### Flexible circuit cable:

Ultra-thin folding cable embedded in the hinge, dynamic bending design to avoid line wear during flipping.

##### Environmental test verification:

Complete high and low temperature, humidity and touch pressure tests to ensure stable operation in multiple scenarios.

##### Precision shaft forging:

High-precision CNC-processed metal hinges are used to ensure smooth 360° flipping and no looseness after thousands of tests.

##### Fully laminated touch screen:

OGS technology integrates the touch layer and panel to reduce reflections and improve touch sensitivity.

##### Integrated metal body:

The aluminum alloy frame is spliced through nano-injection molding technology, taking into account both lightness and drop resistance.

Usage

**Creative design:** suitable for hand-drawn creation by designers, precise touch screen, 360° flip to flexibly adjust the angle.  
**Business presentation:** flip vertical display, touch operation to improve meeting interaction efficiency.  
**Mobile office:** lightweight flip form, suitable for multi-scene office and note annotation.  
**Entertainment and leisure:** touch games, multi-angle viewing, taking into account the experience of tablets and notebooks.  
**Education and learning:** handwritten formulas, electronic textbook annotations, flip mode to help classroom interaction.

**Theory**

- 1. Hinge design: Use dual-axis or multi-axis hinges to achieve 360-degree screen flipping, ensuring stability and durability.
- 2. Touch technology: Equipped with a capacitive touch screen, it supports multi-touch and achieves precise operation by sensing the change of finger current.
- 3. Mode switching: Built-in gravity sensor, automatically identifies notebook, tablet and other modes, and adjusts the display direction.
- 4. Screen reinforcement: Use tempered glass or composite materials to improve the pressure resistance and scratch resistance during touch.
- 5. Driver optimization: The system integrates touch and flip drivers to ensure seamless switching between touch and keyboard input.

**Selling Points**

Flexible multi-mode switching: 360° flip design, easily convert to notebook, tablet, tent or standing mode, suitable for office, creative or entertainment scenes.  
Accurate touch experience: High-sensitivity touch screen, support stylus operation, smooth writing and drawing, improve creative efficiency.  
Lightweight and portable body: 14-inch golden size, taking into account vision and portability, carry it with no burden.  
Rugged and durable design: Strengthen the hinge and screen structure, durable, flip touch more reliable.  
Intelligent sensing adjustment: Automatically rotate the screen direction, intelligently switch between touch and keyboard mode, more convenient operation.
