Theory

Magnetic conversion: intelligent contacts automatically identify PC/tablet mode switching
 Touch display: fully laminated 2.2K screen achieves 10-point touch + precise color gamut
 Dual-mode power supply: the host supplies power to the keyboard backlight and transmits data signals

Image processing: independent ISP chip optimizes 30-frame image stability
Dynamic scheduling: the processor intelligently adjusts performance to match the usage scenario
Product Show

Usage

Mobile office: The magnetic keyboard becomes a productivity tool in seconds, easily handles documents and tables, and supports multi-tasking split-screen operation
Creative design: 2.2K high-color gamut touch screen with pressure-sensitive pen, more accurate drawing and editing, more realistic color presentation
Audio and video entertainment: Tablet mode is more immersive for watching TV series and games, and dual speakers bring cinema-level sound experience
Online learning: Front and rear dual cameras support online class live broadcast, notes and annotations are free
Business meeting: HD camera + intelligent noise reduction microphone, video conference is clear and smooth
Travel companion: Lightweight body to carry with you, you can also work efficiently on high-speed trains and planes
Family sharing: One-click switch between parent mode and child mode, suitable for the whole family

Technology

CNC precision machining: The whole piece of aviation aluminum is finely carved and formed through 36 CNC processes to achieve a 0.1mm-level precision fuselage
Nano injection molding process: The antenna part uses LDS laser direct molding technology to ensure stable signal transmission
Full bonding technology: The 2.2K screen uses OGS full bonding technology, and the touch layer and display layer are seamlessly combined

Magnetic component assembly: The keyboard interface uses a 16-neodymium magnet array and has been tested for 2,000 plug-in and pull-out times
Environmentally friendly surface treatment: Anodizing process creates a delicate touch and passes a 48-hour salt spray test
Intelligent detection system: Each device undergoes 72 automated tests to ensure 100% quality
Dust-free assembly environment: Key components are assembled in a Class 1000 dust-free workshop
